CAREER OBJECTIVE

Aspiring for a Data Analyst Inter, skilled in data analysis, data visualization, basic statistical analysis, and data cleaning tools, I have worked on multi-domain projects. Looking for an internship where I can apply these data analysis skills and meaningful insights for the team

EDUCATION

Bachelor of Technology — Computer Science Engineering (AI & ML) Aug 2023 – Present

Ganga Institute of Technology and Management, Jhajjar, Haryana (Delhi NCR)

PROJECTS

1. E-Commerce Platforms Data Analysis | *Power BI, MS-Excel* Jan 2026

1. Developed interactive Power BI dashboards integrating DAX measures and Power Query transformations to monitor sales performance, customer behavior, and key business KPIs.
2. Executed data cleaning and preprocessing pipelines in Excel utilizing VLOOKUP, Pivot Tables, and conditional formulas to ensure dataset accuracy and consistency prior to analysis.
3. Delivered structured visual reports enabling identification of revenue trends and performance deviations across product categories.

2. India Census 2011 — Demographic Analysis | *Python, Pandas, NumPy, Matplotlib, Jupyter Notebook* Aug 2025

1. Conducted comprehensive exploratory data analysis (EDA) on a national census dataset encompassing population distribution, gender ratios, religious demographics, and occupational statistics across states and districts.
2. Performed systematic data cleaning, null-value treatment, and feature aggregation using Pandas and NumPy; produced publication-quality visualizations via Matplotlib and Seaborn.
3. Identified statistically significant demographic patterns and inter-state disparities through quantitative analysis and comparative charting.

3. Zepto Product Data Analysis | *SQL* Jan 2025

1. Executed end-to-end SQL-based data analysis on a large-scale product dataset, employing multi-table JOINs, GROUP BY aggregations, subqueries, and window functions to extract pricing and discount insights.
2. Derived actionable business intelligence on category-level discount patterns and product performance metrics to inform inventory and pricing strategy recommendations.

TECHNICAL SKILLS

Programming & Analysis: Python — Pandas, NumPy, Matplotlib, Seaborn

Database: SQL — Joins, Aggregations, Subqueries, Group By, Aggregate Functions

Data Visualization: Power BI (Dashboards, KPIs, DAX), Exploratory Data Analysis (EDA)

Spreadsheet Tools: Microsoft Excel (VLOOKUP, Pivot Tables, IF, Charts), Google Sheets

Data Analysis & Reporting: Data Cleaning, Data Aggregation, Statistical Analysis, Data Validation

Machine Learning: Scikit-learn, Streamlit — model building and application deployment

Soft Skills: Analytical Thinking, Problem-Solving, Attention to Detail, Communication, Adaptability

CERTIFICATIONS

1. Data Analytics Virtual Experience Program — Quantium (via Forage)
2. Generative AI-Powered Data Analytics Simulation — Tata Group (via Forage)
